

Dear FCC:Please reject NAB's petition 04-160. I pay for my XM Radio and don't need government regulation or the NAB to tell me what I can or can not listen to. That is my business; not the government's. XM Radio is NOT the public airwaves. It is a private subscription service. Therefore, it is not subject to NAB or government regulation. It is subject to listener demand. We respectfully demand the right to listen to traffic/weather and whatever else we choose. If XM doesn't satisfy us, we have the right to cancel. We don't need NAB or governmental interference.

Thank You,

Clint Ritchie
